24Ah	40pcs

### Battery cabinet assembly for C-20

1. Taking out front & back board, then set the load bar to the bottom iron frame from top to down with one or two more bars.		5. Follow the same way to assemble batteries in the third and forth layers respectively.	
2. Fixing left and right boards.		6. Setting right and left board in the way of step 2.	
3. Put the batteries in this first layer. Note: keep tidy to avoid blocking the lateral board's slot.		7. Put top cover with top board to complete assembly.	
4. Assemble second layer in the same way with left and right boards. And then, put batteries inside.			

Note 1: Do NOT move the battery cabinet after assembly.

Note 2: Battery cabinet C-20 contains four layers with double carton packing.
